

BPE Expansion 2009

On April 1st 2009 Burt Process Equipment opened our new 36,000 square foot state of the art manufacturing facility and distribution center at 100 Overlook Drive in Hamden, Connecticut. Burt Process continues to grow and develop as a leader in Fluid Handling Technologies and as an Innovator of systemized solutions for water and wastewater treatment. Our mission is to be a value added partner with suppliers of world class equipment and technologies that are dedicated to the relentless pursuit of product excellence. Our role is to enable constant product improvement by providing free flow of information from supplier to customer and customer to supplier while providing innovation in process design and systemization.

Burt Process Equipment is an industry leader in corrosion resistant fluid handling equipment. Established in 1970, BPE combines distribution, engineering, and manufacturing for pH neutralization, high purity water, chemical feed, and rainwater harvesting systems. With a manufacturing plant in CT and sales offices along the Eastern United States and California, BPE serves a wide array of industries and institutions including universities, biotech firms, and semiconductor manufacturers
