

Unmatched **Performance**
Unsurspassed **Quality**

Unbeatable Combinations

The Wilden air-operated, double-diaphragm pump has become the most reliable and versatile pump on the market. Unique design characteristics enable Wilden pumps to excel where other pump types fail. A broad range of sizes, materials of construction, and performance attributes provide an optimal solution for your unique fluid transfer application. We have over 45 years of experience solving challenging pre-process, process, and waste applications in

industries ranging from wastewater to semiconductor. We understand how to maximize your yield, increase your up-time, and reduce your costs. Tap into our wealth of experience in solving tough liquid process. Together with our full service local distributors, we have qualified individuals ready to specify, install, maintain, troubleshoot, or repair your equipment. We want to be the power behind your process – Challenge Us.

- Flows to 1041 lpm (275 gpm)
- Pressures to 220.6 bar (3200 psig)
- Temperatures to 176.7° C (350° F)
- Solids passage to 152 mm (6")
- Sizes: 6 mm (1/4") to 203 mm (8")

WILDEN[®]
A DOVER COMPANY

ADVANCED S E R I E S

Advance Your Process

Advanced wetted path designs
Lower the cost of operation
Maximize product containment
Longer MTBF (Mean Time Between Failures)
Enhanced internal clearance
The result of advanced thought

UNITEC™ S E R I E S

Enrich your process

Simplicity of design
Unique technology
Reliable, leak-free, & quiet
Validated & certified
Intrinsically safe
The result of unique thought

SANIFLO™ S A N I T A R Y P U M P T E C H N O L O G Y

Refine your process

Designed for sanitary applications
Minimize product degradation
Improved production yields
Easy to inspect, clean & assemble
Minimized water requirements
The result of progressive thought

ULTRAPURE™ T E F L O N P R O C E S S P U M P S

Optimize your process

Validated & certified
Clean room assembled
Low particle count
Compact, efficient & quiet
Runs on clean-dry air
The result of pure thought

ORIGINAL S E R I E S

Simplify your process

Long standing design simplicity
Portable & submersible
Variable connection options
Fewest parts in industry
Solutions since 1955
The result of original thought

ACCESSORIES

Maximize your process

Electronic control & monitoring
Level control & containment
Pulsation dampening
Drum unloading systems
Complete system solutions
The result of innovative thought
